Portfolio

Mumbai, Maharashtra, India · Available Immediately · Open to Relocation

Summary

Full Stack Developer with 1+ years of internship experience building production-grade web applications using the MERN stack, Python, and Django. Proficient in React.js, Node.js, REST API development, Redis caching, and Docker containerization. Delivered frontend and backend features for live healthcare platforms serving real users. Strong foundation in system design, data structures, and agile development workflows. Seeking a full-time software engineering role to drive impactful, scalable solutions.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL, C++

Frameworks & Libraries: React.js, Node.js, Express.js, Django, Tailwind CSS, Bootstrap, Socket.io

Databases & Caching: MongoDB, MySQL, PostgreSQL, SQLite, Redis

Tools & Platforms: Git, GitHub, Docker, Postman, npm, Netlify, Render, VS Code

Cloud & AI: Oracle Cloud Infrastructure (OCI), OCI Generative AI

Core Concepts: System Design, REST APIs, Caching Strategies, Data Indexing, Real-Time Systems, Agile/Scrum

Experience

Frontend Developer Intern

January 2026 – Present

Kokoro Doctor

Mumbai, Maharashtra (Remote)

- Engineered responsive web interfaces for a mental health platform using React.js and Tailwind CSS, contributing to **4+ production-ready screens** shipped within the first 2 months.
- Designed and delivered a modular UI component library, reducing redundant code by approximately **30%** and accelerating feature development across the team.
- Collaborated with designers and backend engineers in an agile workflow to convert Figma mockups into pixel-accurate, accessible, and performant interfaces.
- Improved cross-device responsiveness and WCAG accessibility compliance, enhancing usability for a diverse patient-facing user base.

Full Stack Developer Intern

May – November 2025

Syntara Healthcare

Mumbai, Maharashtra

- Developed and shipped **3+ core modules** for a patient management platform using the MERN stack under Agile sprint cycles.
- Architected reusable React.js components with Tailwind CSS, improving front-end rendering performance by **25%** and reducing UI build time per feature.
- Optimized MongoDB queries using compound indexing and projection filters, cutting average API response time by **40%** on high-frequency endpoints.
- Contributed to Express.js REST API development and participated in code reviews, maintaining consistent code quality across a team of 5 developers.

Projects

Scalable Task Management System | *Node.js, Redis, Docker, REST APIs*

2025

- Architected a distributed backend system with Redis-based caching for session management and query optimization, reducing simulated data retrieval latency by **60%**.
- Designed RESTful API structure and data indexing strategy to handle concurrent task operations efficiently at scale.
- Containerized the entire application stack using Docker, enabling environment-consistent builds and a reproducible deployment pipeline.
- Applied system design principles including rate limiting, cache invalidation, and modular service separation learned through hands-on implementation.

Dawn of the Werewolf | *React.js, Node.js, Socket.io, Express.js, MongoDB*

January 2025

- Developed a real-time multiplayer social deduction game supporting **10+ concurrent players** with synchronized game state and sub-100ms event latency via Socket.io.
- Implemented private role-based chat channels, day/night cycle transitions, and a live voting system using event-driven backend architecture.

- Designed scalable session management and role assignment logic in Node.js to handle concurrent room states without data conflicts.
- Personal Portfolio** | *React.js, Tailwind CSS, GitHub Pages* | 🌐 Live Demo **April 2024**
- Designed and deployed a fully responsive portfolio with CSS animations, SEO meta optimization, and WCAG accessibility compliance, achieving **90+ Lighthouse score**.

Education

University of Mumbai **2021 – 2024**

Bachelor of Science in Information Technology | **CGPA: 8.75 / 10** *Mumbai, Maharashtra*

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering, Computer Networks

Maharashtra State Board **2019 – 2021**

Higher Secondary Certificate (HSC) | **78%** *Maharashtra*

Certifications

Full Stack Python Development — GTech Jain February 2025

Oracle Cloud Infrastructure AI Foundations — Oracle 2025

Oracle Cloud Infrastructure Generative AI — Oracle 2025

JavaScript Essentials 1 — Cisco Networking Academy April 2025

Python Essentials 1 — Cisco Networking Academy February 2025

Additional Information

Languages: English (Fluent), Hindi (Native), Urdu (Native)

Interests: System Design, Distributed Systems, Real-Time Web Applications, Open Source Development, AI and Cloud Integration
